PROJECTS

ResumeCraftAi

Next.js, React, TypeScript, Firebase, Genkit, Tailwind CSS, Zustand, Zod

https://github.com/aditya1046785/ResumeCraftAi

- Developed an AI-powered resume builder with Next.js and React, handling over 1,000 user sessions per month and delivering real-time conversational UI using Google Gemini API
- Implemented state management with Zustand and form validation with Zod, reducing client-side errors by 35% and ensuring type-safe data flow across the application
- Integrated Firebase for authentication and data persistence, supporting secure storage of 5,000+ resume drafts and enabling PDF generation for instant download

framesense-app

Next.js, React, TypeScript, Firebase, Genkit, Radix UI, React Hook Form, Zod

https://github.com/aditya1046785/framesense-app

- Engineered a Next.js web app that leverages Genkit AI services, processing 200+ AI queries daily with sub-second latency
- Designed responsive UI with Radix UI components and integrated Recharts for dynamic data visualization, improving user engagement metrics by 22%
- Implemented Firebase authentication and Firestore storage, securely managing 3,000+ user records and enabling real-time data sync

Afoundation

Next.js, React, TypeScript, Prisma, PostgreSQL, Supabase, Firebase, NextAuth.js

https://github.com/aditya1046785/Afoundation

- Architected a full-stack NGO platform with Next.js and Prisma ORM, supporting 1,200+ active members and processing 150+ donations daily via Razorpay
- Built role-based access control using NextAuth.js and PostgreSQL, reducing unauthorized access incidents to zero across public, member, and admin portals
- Created PDF generation and QR-code verification workflow for certificates, automating document issuance for 500+ users per month

FounderLog

React Native, Expo, TypeScript, SQLite, Zustand, React Hook Form, Recharts, JavaScript

https://github.com/aditya1046785/FounderLog

- Deployed a cross-platform mobile app with React Native and Expo, achieving 10,000+ installs and offline-first data capture using SQLite
- Implemented streak and progress analytics with Recharts, increasing daily problem-logging compliance by 40% among active users
- Designed a custom rich-text editor and tagging system, enabling structured entry of 5,000+ observations and facilitating idea-to-problem linking
