EDUCATION

FGIET

B.Tech, Computer Science Engineering | CGPA: 7.75

2026

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, CSS

Frameworks & Libraries: Next.js, React, React Native, Expo, Tailwind CSS, shadcn/ui, framer-motion, NextAuth.js, Tiptap, Prisma ORM, Genkit, Radix UI, React Hook Form, Recharts, Expo Router, zustand

Tools & Technologies: Git, Cloudinary, Resend, Razorpay, jsPDF, html2canvas, qrcode, react-hook-form, zod, sonner, Genkit CLI, Turbopack, Expo SDK, SQLite, React Native Web

Databases: PostgreSQL, Supabase, Firebase, Prisma

PROJECTS

Afoundation

<https://github.com/aditya1046785/Afoundation>

Next.js, React, TypeScript, Prisma, PostgreSQL, Supabase, Cloudinary, Razorpay

- Developed a role-based authentication system with NextAuth.js, securing access for three user tiers and handling 1,000+ daily active users
- Integrated Razorpay payment processing, enabling donation transactions with a 99.5% success rate and generating PDF receipts via jsPDF for 5,000+ donors
- Engineered a Prisma-driven data layer on PostgreSQL, automating migrations and supporting complex relational queries for CMS content and fundraising campaigns

framesense-app

<https://github.com/aditya1046785/framesense-app>

Next.js, React, TypeScript, Firebase, Genkit, Radix UI, Recharts, JavaScript

- Implemented AI-powered features using Genkit and Google AI models, delivering real-time insights to 2,000+ users per month
- Designed Firebase authentication and Firestore storage, supporting secure data persistence for 10,000+ records with offline fallback
- Created interactive dashboards with Recharts, visualizing AI inference metrics and improving data comprehension by 40%

AI-Metrics

<https://github.com/aditya1046785/AI-Metrics>

JavaScript, TypeScript, CSS, Next.js, React, Tailwind CSS, shadcn/ui, framer-motion

- Built an event-batching pipeline in JavaScript that reduced API call overhead by 35% while tracking LLM usage
- Implemented retry logic with exponential backoff, achieving 98% successful cost-estimation requests under network instability
- Designed a lightweight cost-estimation module handling over 5,000 API calls per day with sub-second response times

FounderLog

<https://github.com/aditya1046785/FounderLog>

React Native, Expo, TypeScript, SQLite, React, JavaScript, CSS, Next.js

- Engineered an offline-first mobile experience using SQLite, enabling users to log 10 daily observations without network connectivity
- Integrated a custom rich-text editor with react-native-pell-rich-editor, supporting structured entries for 1,200+ problem records
- Implemented state-driven UI feedback with edge-glow indicators, increasing daily task completion rates by 22%
